

Day 3 – HTML Headings, Paragraphs & Formatting Tags

1. HTML Headings - <h1> to <h6>

HTML provides 6 heading tags:

<h1>Main Title</h1>

<h2>Sub Title</h2>

<h3>Section Heading</h3>

<h4>Sub Section</h4>

<h5>Minor Heading</h5>

<h6>Smallest Heading</h6>

SEO Tip: Use only one <h1> per page. Use others for proper structure.

2. Paragraph Tag - <p>

The <p> tag defines a paragraph and adds spacing above and below.

Example:

<p>This is a paragraph.</p>

3. Formatting Tags

 - Bold text

<i> - Italic text

<u> - Underlined text

 - Line break (no closing tag)

Example:

<p>This is bold, <i>italic</i>, and <u>underlined</u>.</p>

<p>Line 1
Line 2</p>

4. Best Practices

- Use <h1> only once
- Use headings to structure content
- Keep paragraphs short and readable
- Use formatting tags only where necessary

5. Mini Quiz

1. Which tag is used for the main heading?
A. <h6> B. <p> C. <h1> [Correct]
2. Which tag breaks a line?
