

Ch-2 Harmony in human being

- ① Coexistence of Self & body
- Human beings are made up of 2 parts: 1, Self
2, body
- Self: (I)
- Needs: Trust, Respect, happiness (continuously)
- Qualitative
 - Fullfilled by Right understanding & Right feeling
 - Activity: Thinking, Dreaming etc...
- Body
- Needs: Food, clothing, shelter etc... (changes)
- Quantitative
 - Fullfilled by Food, clothing
 - Activity: Breathing, heart-beat

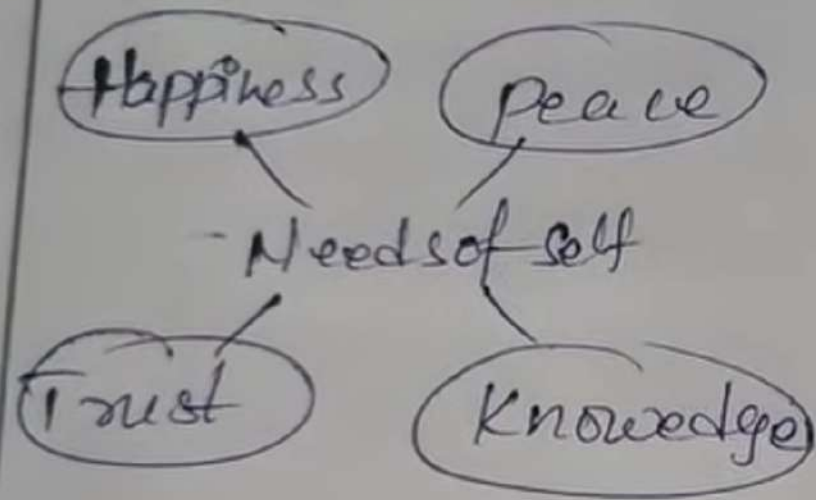

①

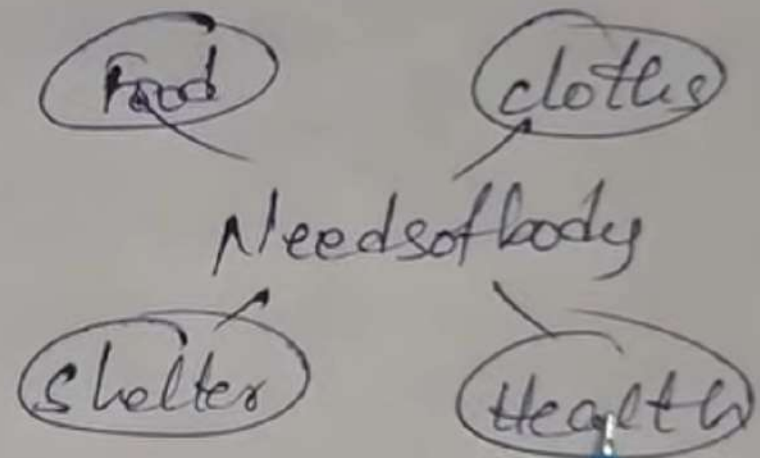

② Needs of Self and body

Self	body
1. Non-material	1. Material in nature
2. Related to thoughts	2. Related to physical survival
3. Ex: Happiness, peace	3. Food, water, clothes
4. Continuous	4. Temporary (changes)
5. Self controls the body	5. Body serves the self
6. Can't be measured	6. Can be measured

② Needs of Self

Needs of Body

③ Body is an instrument of the self

The self is the part of us that thinks, understands & decides, while the body is the physical part that does actions. The Body works like an instrument or tool because whatever the self decides, the body follows and performs that

- Self gives instructions - Body carries them out
- Self needs happiness - Body needs food & rest
- Body performs the tasks which are given by self
- If our actions are harmful i.e. thoughts and harm

⑤ Harmony of the Self with the body

Harmony of the Self with the Body means the Self guides the Body correctly, and the Body follows in a healthy & balanced way. When the Self has right understanding & the body is cared properly, both work together smoothly & support our overall well-being

- Self gives right decisions - Body follows right way
 - Self gives wrong decisions - Body follows wrong way
- Inputs - Eyes, Ears, (nose)
Outputs - Hands, legs, (Actions)

⑤ Self Regulation and health:

Sanyam - Self control (Self Regulation)

Swasthya - Health

Sanyam - controlling & guiding the body with right understanding

Ex: choosing healthy instead of junk

decide to study instead of wasting time

Swasthya: The condition where the self and body works in balance

→ Your self & body are in harmony you feel healthy

connection:

→ When self regulates the body properly, the body stays healthy

→ If self lacks understanding the body gets mis-used (poor health)
