

****1. Right Understanding, Relationship and Physical Facility**

(Holistic Development and the Role of Education)**

Human beings need **three things** for a happy and meaningful life:

a) Right Understanding

- It means *knowing reality correctly*.
- Understanding:
 - What is valuable?
 - What is right or wrong?
 - How to live in harmony with others and nature?
- Comes through **self-exploration**, learning, and inner clarity.
- Right understanding guides all decisions.

b) Relationship

- Human beings naturally want:
 - trust
 - respect
 - affection
 - love
 - care

- When relationships are harmonious, life becomes peaceful.
- Problems in society (violence, cheating, stress) occur when relationships break.

c) Physical Facility

- Material things needed for survival: food, clothes, house, job, money, tools, etc.
- Required **in limitation** — not unlimited.
- Misunderstanding causes **over-focus on money**, ignoring relationships and understanding.

Holistic Development

A person is complete only when all three are balanced:

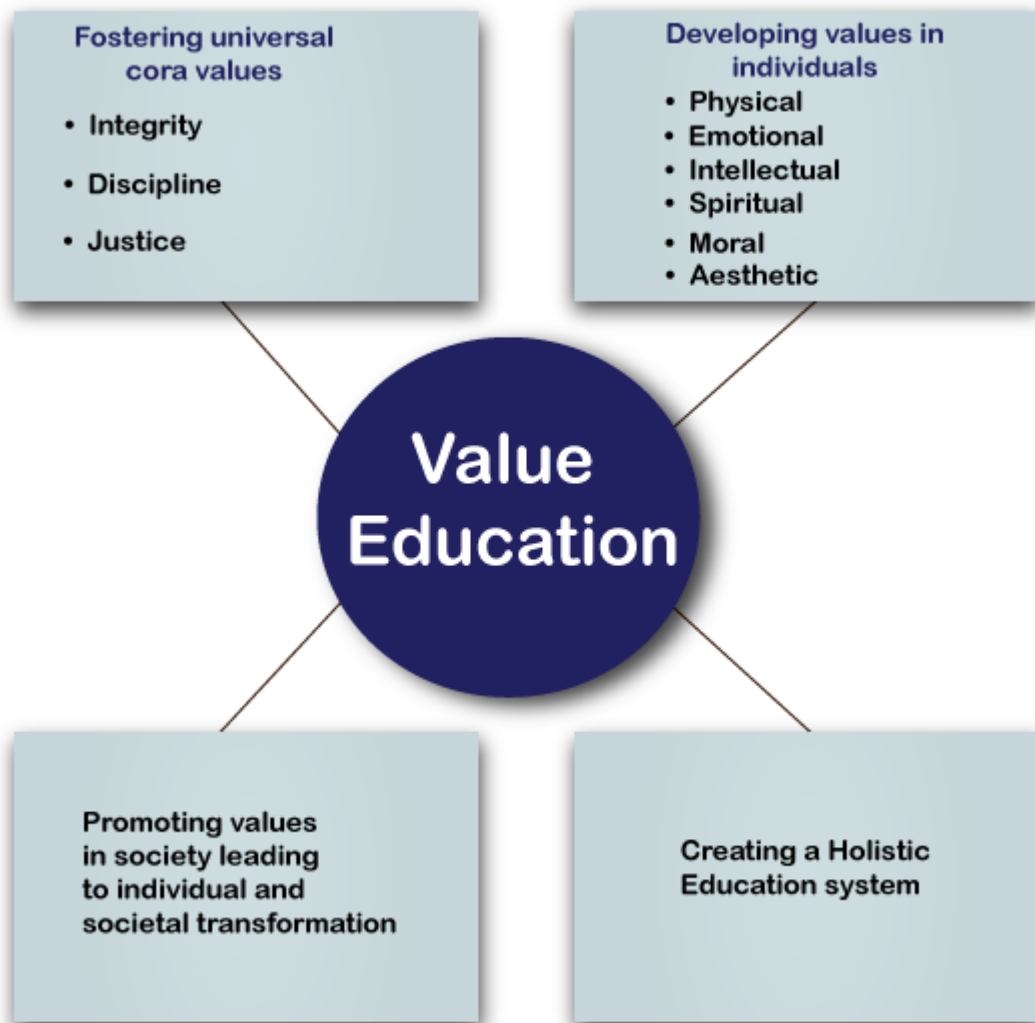

Right Understanding → Healthy Relationships → Proper Use of Physical Facilities

Role of Education

Education must help the student:

1. Understand themselves (Self-awareness)
2. Build healthy relationships
3. Use physical facilities correctly
4. Live a happy, responsible, and meaningful life.

2. Understanding Value Education

Value Education means:

A systematic way to understand **what is valuable** for a human being.

Objectives:

- To live with **happiness, peace, and harmony**.
- To develop positive human qualities:
 - Trust
 - Respect
 - Responsibility
 - Compassion
 - Cooperation
- To develop correct understanding of self and society.

Why Value Education is Needed Today?

- Increase in stress, depression.

- Material-focused lifestyle.
- Break of relationships.
- Violence and corruption.
- Environmental issues.

Value education gives clarity to live a **balanced, ethical, and fulfilling life**.

3. Self-Exploration as the Process of Value Education

Purpose of Self Exploration

1

Knowing personal values

2

Understanding emotional triggers

3

Enhancing mental and emotional well-being

4

Defining goals

5

Improving self-acceptance

Self-exploration means:

- Studying and observing *yourself*.

- Understanding:
 - Your thoughts
 - Your feelings
 - Your desires
 - What you truly want from life

It is **not about others telling you what is good.**

It is *you realizing what is good* through inner clarity.

Steps in Self-Exploration:

1. **Identify what makes you genuinely happy**
2. **Observe your natural acceptance** (inner voice saying “this feels right”)
3. **Compare natural acceptance with your actions**
4. **Correct your actions accordingly**

This brings peace within you.

4. Continuous Happiness and Prosperity – Basic Human Aspirations

Every human being wants:

1. Continuous Happiness

- Happiness in all moments
- Happiness in family, society, work
- Comes from:
 - Right understanding
 - Good relationships
 - Living without conflict

2. Prosperity

- Having enough physical facilities
- Feeling “I have more than enough for my needs”
- Comes from:
 - Earning in the right way
 - Proper management of resources
 - Avoiding overconsumption

Both are required, not just money.

5. Happiness and Prosperity – Current Scenario

Problems today:

- People earn more but still unhappy.
- Stress, depression, anxiety increasing.
- Relationships breaking due to ego, expectations.
- Materialism → unlimited craving for money.
- Overuse of resources → pollution, climate issues.

Reason: Lack of Right Understanding.

People believe:

- Money = happiness (which is incomplete)
 - But happiness mainly comes from good relationships and clarity of thoughts.
-

6. Method to Fulfill Basic Human Aspirations

Two-step Method:

1. **Right Understanding**
 - Through self-exploration

- Understanding harmony in yourself, family, society, nature

2. Right Living

- Proper living based on right understanding
- Includes:
 - Mutual happiness in relationships
 - Mutual prosperity in work
 - Responsible use of physical facilities

If we follow these steps, happiness and prosperity become natural.

Practice Sessions

Practice Session 1: Sharing About Oneself

Objective:

- To develop openness and trust.
- To understand yourself better.
- To share:
 - Your background
 - Strengths and weaknesses
 - Aspirations in life
 - What makes you happy

This builds confidence and helps improve relationships.

Practice Session 2: Exploring Human Consciousness

What is Consciousness?

- Ability to think
- Ability to understand
- Ability to feel
- Awareness of right and wrong

Exploring consciousness helps students:

- Understand their thoughts
- Control negative emotions

- Become more mindful
 - Make value-based decisions
-

Practice Session 3: Exploring Natural Acceptance

Natural Acceptance (NA)

Your **inner voice** that tells you what is right.

Examples:

- You naturally like honesty → dishonesty makes you uncomfortable.
- You naturally like respect → disrespect feels wrong.
- You naturally want peace → conflict hurts.

By checking every action with NA:

- Actions become correct
- Decisions become easy
- Life becomes peaceful
-

UNIT – 2

1. Understanding Human Being as the Co-existence of the Self and the Body

-
-
- A human being is made of **two distinct but co-existing parts**:
- **a) The Self (I)**
- The conscious entity
- Does thinking, feeling, understanding, decision-making
- Non-material in nature
- Wants happiness
- **b) The Body**
- The physical/biological part
- Made of physical material
- Needs food, rest, physical comfort
- Works as a tool/instrument for the self
- **Co-existence**
- The self uses the body
- Both work together for complete well-being
- Example:
- Self decides to study
- Body performs reading, writing actions
- ---
- **2. Distinguishing Between the Needs of the Self and the Body**
-

Maslow's hierarchy of needs

-
- **Needs of the Self (psychological / inner needs)**

- | | |
|---------------------|-----------------|
| • Self Needs | • Nature |
| • Happiness | • Qualitative |
| • Respect | • Qualitative |
| • Trust | • Qualitative |
| • Love | • Continuous |
| • Knowledge | • Continuous |

- **Characteristics:**
- Non-material
- Unlimited in time (lifelong)
- Fulfilled by understanding & relationships

- **Needs of the Body (physical needs)**

- | | |
|---------------------|-----------------|
| • Body Needs | • Nature |
| • Food | • Quantitative |

- **Body Needs**
- **Nature**
- Clothes
- Quantitative
- Shelter
- Quantitative
- Physical comfort
- Repeated
- Medicines
- Limited

- **Characteristics:**

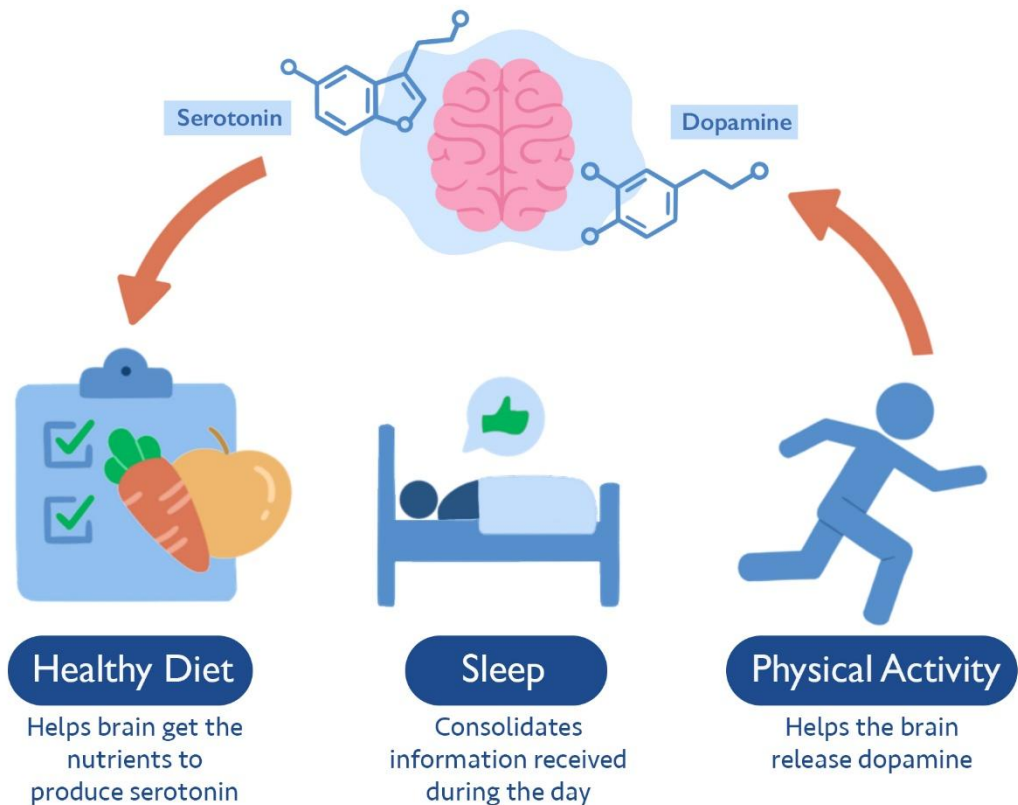

- Material in nature
- Satisfied through physical facilities
- Limited and measurable

- **Difference Summary**

- | | |
|-----------------------------|----------------------------|
| • Self | • Body |
| • Wants happiness | • Wants physical comfort |
| • Non-material | • Material |
| • Continuous needs | • Temporary needs |
| • Needs right understanding | • Needs physical resources |

- **3. The Body as an Instrument of the Self**

-

-
- The **self controls the body**.
- The body performs action based on the self's decisions.
- Body is like a **machine**, and the self is the **operator**.
- **Examples:**
- Self decides to write → body moves hand.
- Self decides to walk → body starts walking.
- If the self is confused → body may not act correctly.
- Thus, **happy self = healthy body**.

• **4. Understanding Harmony in the Self**

- Harmony in the self means:
- No inner conflict
- Clear understanding
- Thoughts, behavior, and feelings match
- Peace and satisfaction from within
- **When harmony exists:**
- Decisions are right

- Emotions are stable
- Stress reduces
- Mind becomes peaceful

-

- **5. Harmony of the Self with the Body**

- The self-body relationship becomes harmonious when:
- The self takes care of the body
- The body obeys the decisions of the self
- No misuse of the body
- Healthy habits are followed

- **Examples:**

- Eating only what is needed
- Sleeping properly
- Avoiding harmful things (alcohol, drugs)
- Exercising regularly
- Harmony = Proper care + Proper use

-

- **6. Programme to Ensure Self-Regulation and Health**

- To ensure harmony and health, we need a systematic program:

- **1. Right Understanding**

- Through self-exploration
- Knowing what is right for self & body

- **2. Right Feelings**

- Ensuring trust, respect, affection in relationships

- **3. Right Thought**

- Clarity in decisions

- **4. Right Behavior**

- Balanced diet
- Regular sleep
- Avoiding bad habits

- **5. Right Work**

- Physical exercise
- Yoga, meditation
- Proper study/work schedule
- This complete program ensures:
- Healthy mind
- Healthy body
- Discipline
- Self-regulation

- **Practice Sessions**

- **Practice Session 4: Exploring the Difference of Needs of Self and Body**

- Students analyze:
- What makes their **self** happy? (love, trust, respect)
- What the **body** needs? (food, water, rest)
- **Activity:**
- List 5 needs of self & 5 needs of body.
- This creates clarity about which needs are **continuous** and which are **limited**.

- **Practice Session 5: Exploring Sources of Imagination in the Self**

- Self generates imagination through:
- Past experiences
- External information
- Internal desires
- Observations
- Memory
- **Activity:**
- Students sit silently and observe:
- What thoughts arise?
- Where these thoughts come from?
- This increases awareness of the mind.

- ---
- **Practice Session 6: Exploring Harmony of the Self with the Body**
- **Activities:**
- Observe hunger vs emotional eating
- Check body posture while studying
- Notice stress impact on body
- Practice 5 minutes of sitting silently
- Outcome:
- Understand how mind affects body
- Learn to regulate actions
- Develop self-discipline

UNIT- 3

1. Harmony in the Family – The Basic Unit of Human Interaction

Family is the **first and most important** place where human interaction happens.

Why family is the basic unit?

- It is where we learn values
- We develop trust, respect, affection
- We understand responsibility
- We learn how to live with others

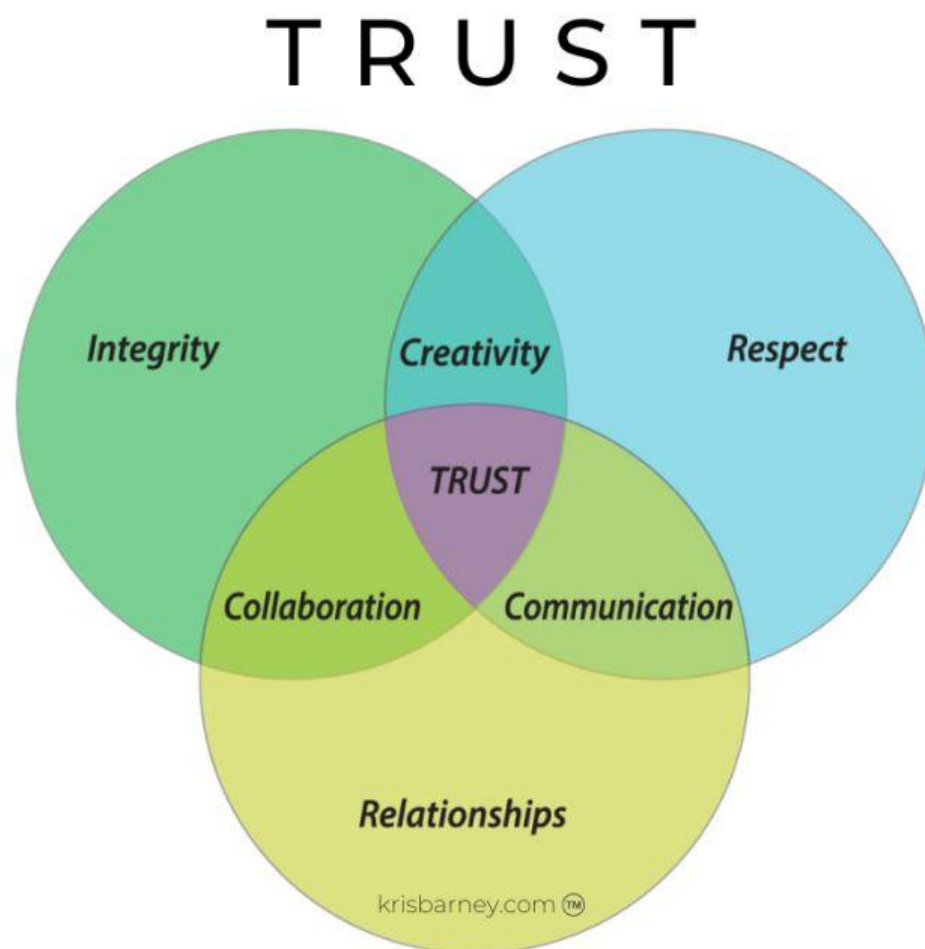

Harmony in the family means:

- Mutual understanding
- Mutual respect

- Caring for each other
- Sharing & cooperation
- No conflict, no fear

When family is harmonious → individual becomes peaceful → society becomes better.

2. 'Trust' – The Foundational Value in Relationship

Trust is the **most basic and essential feeling** in any human relationship.

Meaning of Trust:

“Acceptance that the other person intends my happiness and prosperity.”

Why trust is foundational?

- Without trust, fear and suspicion arise
- With trust, communication becomes easy

- Trust builds strong relationships
- Trust reduces conflict

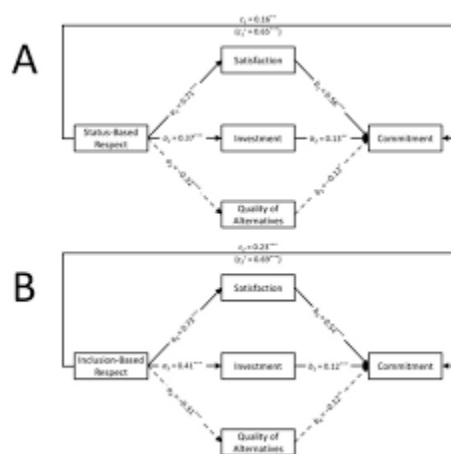

Example:

If parents trust their children → children feel confident.

If children trust parents → they feel safe and understood.

Trust = Base for all other values (respect, affection, love).

3. 'Respect' – Right Evaluation

Respect means **right evaluation** of the other person.

What is Right Evaluation?

- Seeing the **purpose, capabilities, and values** of a person
- Not based on:
 - money
 - power
 - looks
 - job
 - status

Why do we respect a human?

Because every human being:

- Wants to be happy
- Has natural acceptance
- Is capable of understanding

- Has the potential to improve

Respect is unconditional.

We respect the person, not their physical appearance or possessions.

4. Other Feelings in Relationships

Human relationships include **nine essential feelings**:

1. **Trust**
2. **Respect**
3. **Affection**
4. **Care**
5. **Guidance**
6. **Reverence**
7. **Glory**
8. **Gratitude**
9. **Love** (the complete value)

These feelings arise naturally when there is right understanding.

5. Justice in Human-to-Human Relationship

Justice means **harmony in human relationships** through:

4 elements of Justice

1. **Recognition of the relationship**
2. **Right evaluation**
3. **Right feelings**
4. **Right behavior**

When these four are present → justice is ensured.

Justice leads to **mutual happiness**.

6. Understanding Harmony in the Society

Society is built from families; harmonious families → harmonious society.

A society is harmonious when:

- People live with mutual trust
- Work cooperatively
- Respect each other
- Provide correct justice
- Share resources responsibly

Levels of Harmony:

1. **Individual**
2. **Family**
3. **Society**
4. **Nature**
5. **Existence**

A peaceful society begins from understanding at the individual level.

7. Vision for the Universal Human Order

Universal Human Order is a **world where everyone lives with peace, happiness, and prosperity.**

Key features:

- Justice in relationships
- Prosperity for all
- No exploitation or discrimination
- Protection of nature
- Fearlessness in society
- Coexistence with environment

This vision is achievable through:

- Right understanding
 - Value-based education
 - Living in harmony
-

Practice Sessions

Practice Session 7: Exploring the Feeling of Trust

Activities:

- Students think of someone they trust and why.
- Discuss situations where trust was broken.
- Identify misunderstandings due to lack of trust.

Outcome:

- Understand trust is a natural value.
 - Develop deeper relationships.
-

Practice Session 8: Exploring the Feeling of Respect**Activities:**

- Make a list of people you respect & why.
- Evaluate whether your respect is based on:
 - wealth
 - position
 - or genuine human qualities

Outcome:

- Understand the difference between **conditional respect** and **genuine respect**.
-

Practice Session 9: Exploring Systems to Fulfill the Human Goal

Human goals are:

1. **Right Understanding**
2. **Healthy Relationships**
3. **Prosperity**
4. **Harmony in society & nature**

Activity:

Students identify:

- What systems (family, education, society) support these goals
- What needs to improve
- How they can contribute

Outcome:

- Awareness of one's role in building a harmonious society.

UNIT – 4

1. Understanding Harmony in Nature

Harmony in nature means:

- Every component of nature works in a **balanced, predictable, and supportive** manner.
- Nature operates with **order**, not randomness.
- All entities support each other → leading to **mutual fulfillment**.

Nature is always in:

- **Harmony** (balanced cycles)
- **Continuity** (process never breaks)
- **Mutual dependence** (everything supports everything)

Examples:

- Seasons come regularly
- Plants make oxygen; animals use oxygen
- Water cycle continues endlessly
- Trees prevent soil erosion
- Bees help in pollination

Nature functions as a **well-coordinated system**.

2. Interconnectedness, Self-Regulation & Mutual Fulfillment among the Four Orders of Nature

There are **four orders** (levels) in nature:

(a) Material Order (Inorganic)

- Soil, metals, water, air, minerals
 - No desire, no feelings
 - Provides physical support (food, resources)
-

(b) Plant/Bio Order

- Trees, plants, crops
 - Needs sunlight, water
 - Helps:
 - Oxygen production
 - Food supply
 - Ecological balance
-

(c) Animal Order

- Birds, fishes, animals
 - Instinct-driven
 - Limited desires
 - Needs food, shelter, reproduction
-

(d) Human Order

- Humans have:
 - **Desires unlimited (in mind)**
 - **Imagination**
 - **Understanding**
 - Responsible for maintaining harmony among all four orders
-

Interconnectedness

All four orders depend on each other:

- Plants need soil (material).
- Animals need plants and water.
- Humans need all three lower orders.
- Nature maintains balance through cycles (carbon, water, nitrogen).

Self-Regulation

Nature regulates itself without external control:

- Water cycle
- Oxygen–Carbon dioxide balance
- Climate & seasons
- Food chain

This is called **self-organization** or **self-regulation**.

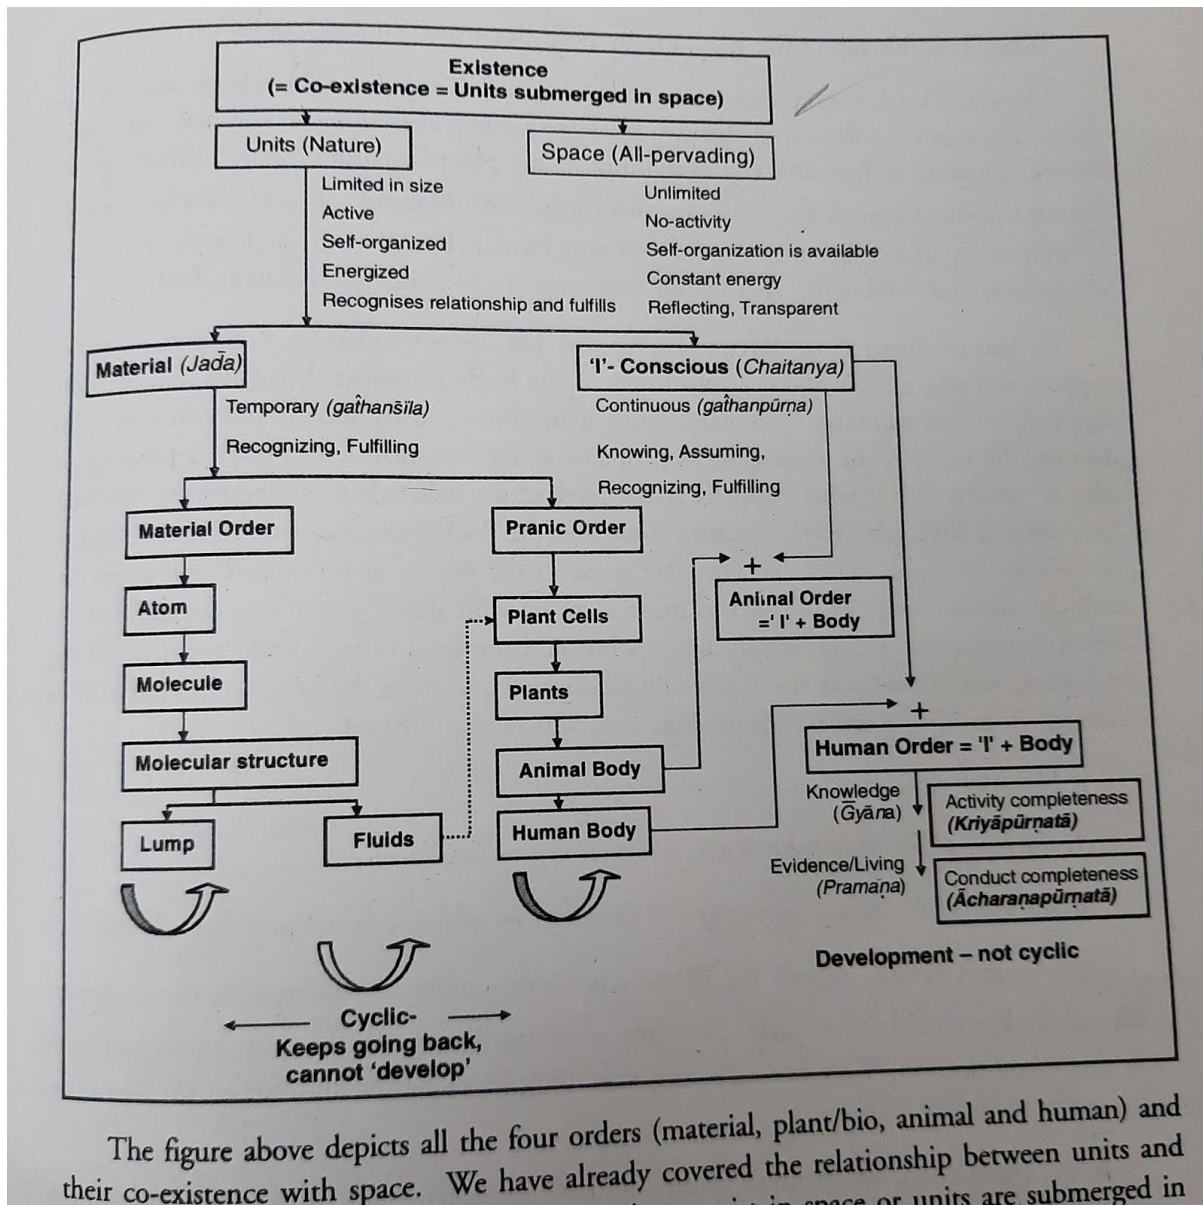

Mutual Fulfillment

Each order fulfills the needs of others:

Order	What It Receives	What It Gives
Material	Nothing	Soil, minerals, water
Plant	Soil, water, sunlight	Food, oxygen, shelter
Animal	Food, oxygen	Movement in ecosystem, pollination
Human	All resources	Protection & responsible use

When humans live responsibly → mutual fulfillment happens smoothly.

3. Realizing Existence as Co-existence at All Levels

Existence = Co-existence

Everything in nature exists **together** and **supports each other**.

Examples:

- Plants + animals = oxygen-CO₂ balance
- Sunlight + plants = food production
- Water + soil = plant growth
- Bees + flowers = pollination

Nothing exists alone.

Everything is in a **network of relationships**.

When humans understand this → they stop exploiting nature.

4. Holistic Perception of Harmony in Existence

Holistic perception means:

- Understanding harmony not only at an individual level
- but also at:
 - family
 - society
 - nature
 - existence

At all levels there is:

1. **Co-existence**
2. **Mutual nourishment**
3. **Self-regulation**
4. **Balance & order**

When humans align with this harmony → the world becomes peaceful.

Practice Sessions

Practice Session 10: Exploring the Four Orders of Nature

Activity:

Students identify examples of all four orders:

- **Material:** stones, metals, air
- **Plant:** trees, crops
- **Animal:** dog, cow, birds
- **Human:** self and others

Outcome:

Understanding differences & mutual relationships among the four orders.

Practice Session 11: Exploring Co-existence in Existence

Activity:

- Observe any natural system (garden, pond, field)
- Identify how each component depends on the other

- Recognize mutual relationships:
 - plant ↔ sunlight
 - animal ↔ plant
 - water ↔ soil
 - human ↔ nature

Outcome:

Realization that **everything exists in relationship**, nothing exists in isolation.

UNIT – 5

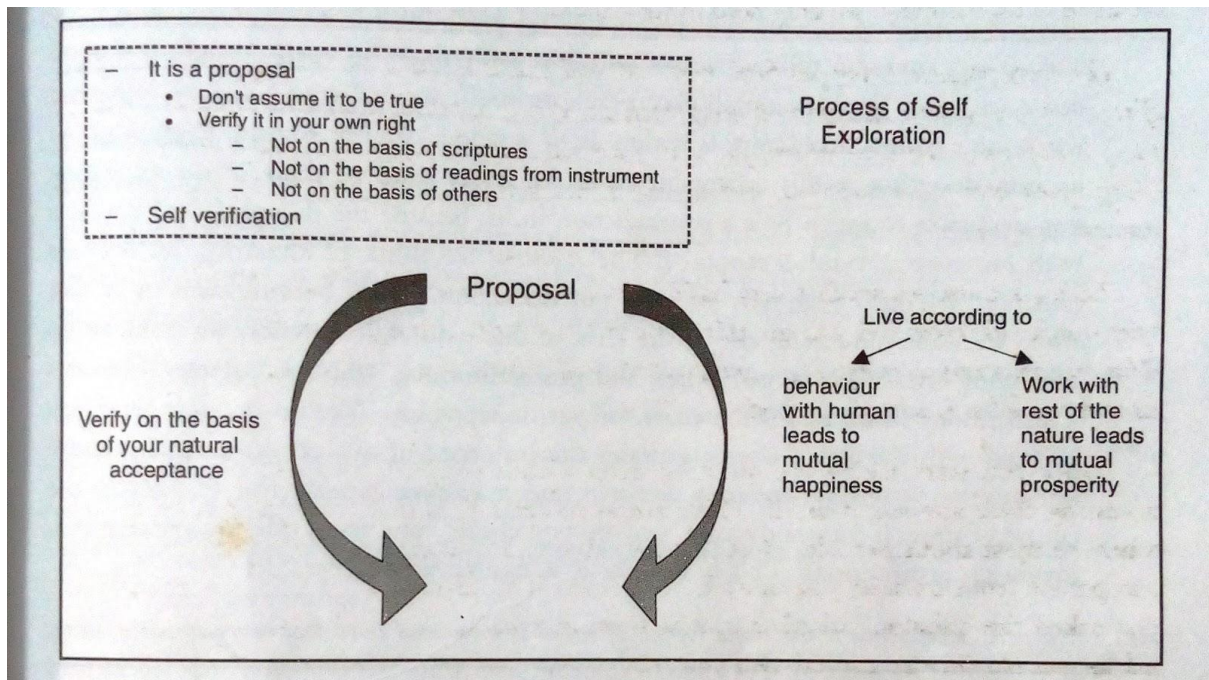

1. Natural Acceptance of Human Values

Natural acceptance of human values

- Human Values – Understanding of the role of Human Beings in Existence

Once we have the right understanding (relationship, harmony and co-existence), we are able to see our natural participation or values at all levels of being – from individual to family, society, nature/existence.

This participation or human values are definite and form the basis of our ethical human conduct.

Natural Acceptance (NA) is the **inner voice** that tells us what is right or wrong. It is **innate, universal, and constant**.

Characteristics of Natural Acceptance

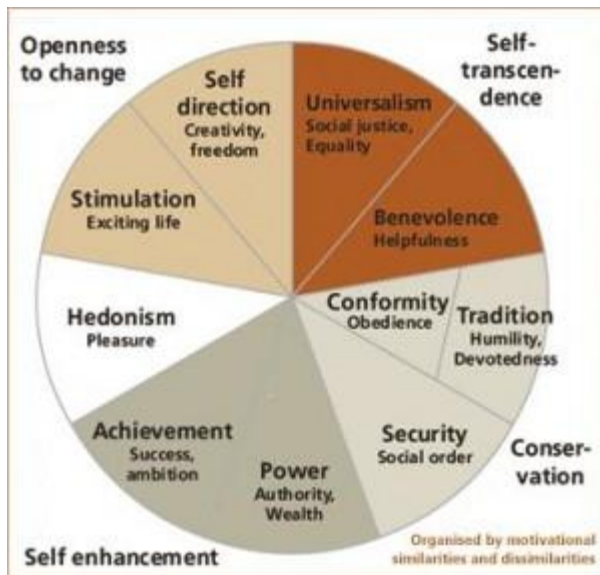

- Independent of culture, religion, or society
- Same for all humans
- Never changes with time
- Guides ethical behavior

Examples:

- We naturally want **happiness**, not sorrow
- We want **love**, not hatred
- We want **trust**, not doubt
- We want **respect**, not insult

Natural acceptance forms the **foundation of human values**.

2. Definitiveness of (Ethical) Human Conduct

Ethical human conduct is **definite**, not dependent on situations.

Ethical Human Conduct means:

- Acting according to natural acceptance
- Ensuring harmony in:
 - self
 - family
 - society
 - nature

Definitive Conduct includes:

1. Living with trust and respect
2. Being responsible
3. No exploitation
4. Non-violence
5. Working for mutual happiness and mutual prosperity

When we understand human values → conduct becomes **definite** and **consistent**.

3. Basis for Humanistic Education, Humanistic Constitution & Universal Human Order**Humanistic Education**

Education must help students:

- Understand self
- Live with human values
- Build good relationships
- Become responsible professionals

Objective: Development of the whole person — not only job skills.

Humanistic Constitution

A constitution must:

- Ensure justice
- Protect human rights
- Promote equality
- Keep society peaceful
- Ensure freedom to live with dignity

Values like trust, respect, and cooperation must guide laws and governance.

Universal Human Order

A society/world where:

- Every human is happy
- Every family is prosperous
- Nations live without fear

- Humans live in harmony with nature

This universal order is built on:

- Right understanding
- Ethical conduct
- Value-based systems

4. Competence in Professional Ethics

UNIVERSAL HUMAN VALUES AND PROFESSIONAL ETHICS

DR. TRIBHUWAN KUMAR PRASHANTH KUMAR.H.P MUKESH CHAUDHARI NEHA ANAND

A professional must have **three types of competence**:

1. Competence of Understanding

- Knowing the purpose of profession
- Understanding human values
- Knowing the consequences of decisions

2. Competence of Technology

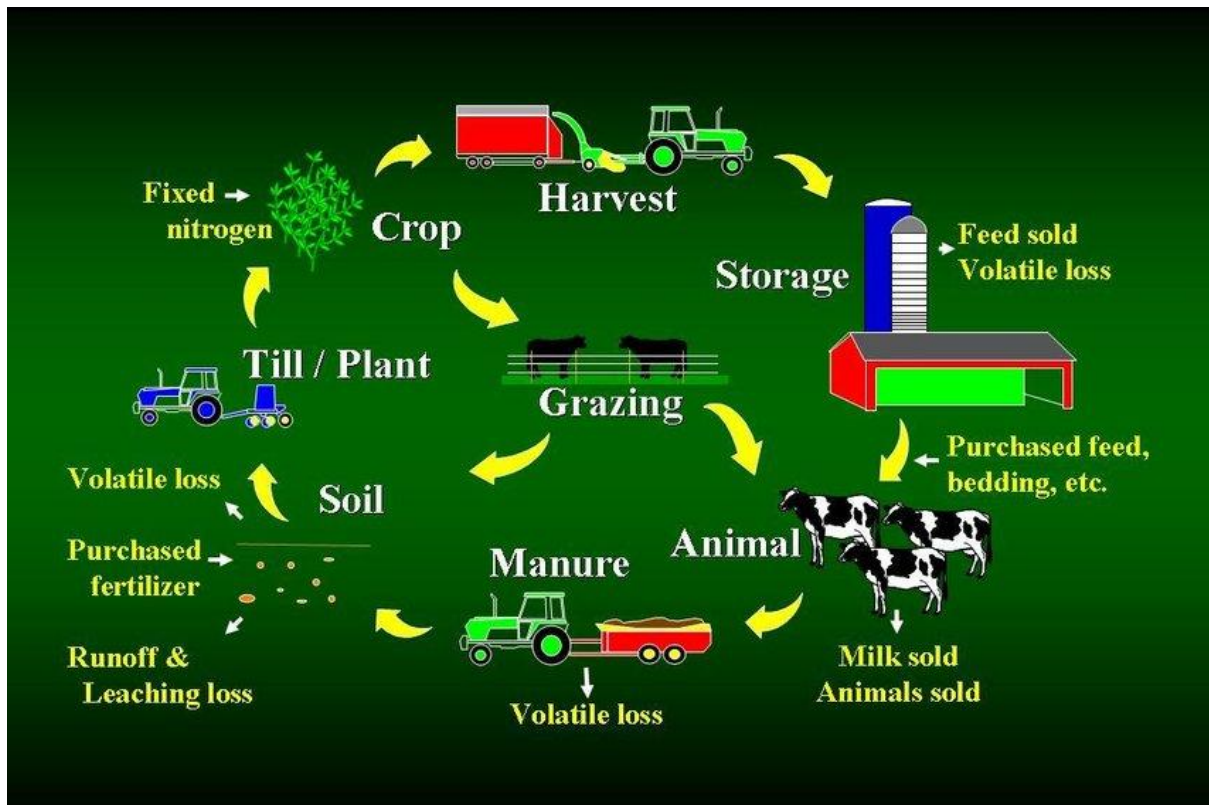

- Skill + knowledge
- Ability to create safe, efficient, eco-friendly solutions

3. Competence of Ethical Behavior

- Honesty
- Transparency
- No misuse of power
- Responsibility to society

A true professional ensures **mutual happiness, mutual prosperity, and sustainability**.

5. Holistic Technologies, Production Systems & Management Models

Holistic Technologies

Technologies that:

- Support human values
- Avoid exploitation
- Are sustainable
- Do not harm nature

Examples:

- Renewable energy systems
- Organic farming technologies
- Water purification systems
- Eco-friendly buildings

Holistic Production Systems

Systems that ensure:

- Quality output
- No waste
- Minimum pollution

- Worker well-being
- Resource conservation

Examples:

- Circular economy
 - Green manufacturing
 - Zero-waste processes
-

Humanistic Management Models

Management that focuses on:

- Team cooperation
- Equal respect
- Fairness
- Transparency
- Mutual growth

Not profit-only models → but people-centered models.

6. Typical Case Studies

Common examples used in UHV:

- Amul Cooperative Model (mutual prosperity)
- ISRO (mission-driven, ethical teamwork)
- Tata Group (ethical business practices)
- Mid-day Meal Scheme (social responsibility)
- Bhoodan Movement by Vinoba Bhave (community harmony)

These illustrate:

- Responsibility
 - Sustainability
 - Cooperation
 - Value-based leadership
-

7. Strategies for Transition Toward Value-based Life & Profession

Transition means shifting from:

- Competition → cooperation
- Exploitation → mutual prosperity
- Materialism → balanced living

Strategies:

1. **Self-exploration**
2. **Living with natural acceptance**
3. **Strengthening family relationships**
4. **Choosing ethical career paths**
5. **Using sustainable technologies**
6. **Supporting social harmony**
7. **Lifelong learning of values**

This ensures a **value-based lifestyle** and **ethical professional behavior**.

Practice Sessions

Practice Session 12: Exploring Ethical Human Conduct

Activities:

- Identify situations where you acted ethically
- Identify situations where you acted unethically
- Discuss how natural acceptance guided you

Outcome:

Understanding that ethical conduct is natural, easy, and necessary.

Practice Session 13: Exploring Humanistic Models in Education

Activities:

- Compare traditional vs humanistic education
- Identify values missing from current education
- Suggest improvements

Outcome:

Clarity about value-based education systems.

Practice Session 14: Exploring Steps of Transition Towards Universal Human Order

Activities:

- Students create a plan for:
 - Personal transformation
 - Family harmony
 - Social contribution
 - Eco-friendly practices

Outcome:

Understanding how individual change leads to global harmony.
